

Community Collaborative Rain, Hail & Snow Network

Southern

New England

August 2022

Summer thunderstorms make precipitation variable. Rain on one side of town, but not the other. Having as many as you helps capture the variability that summer brings.

This group continues to stand out. Look at the map of Condition Monitoring Reports and see this cluster of reports on our area. Significant Weather Reports continues to be a strong point of ours. Between tropical cyclones named Henri and Ida in Year 2021, and our typical array of snow events, our area leads the network in the past 12 months. And the Rulers of the Snow, those unique observers who report snow fall and snowpack with every report, are a strong concentration in our area.

Drought assessments continue. The Drought Meetings will continue until they are rained out! When it comes to assessing drought, having all of you report as frequently as you, leaves little doubt!

Plenty included about your station totals.

We lead off, as we always do, with our version of "The Grand List". Our first stations have crossed 5,000 Daily Reports.

Let's get into it.

The “Grand” List

Congratulations to all of these observers from our three states who have recently passed a milestone of 1000 Daily Reports.

Observer Tips

The new map: maps.cocorahs.org Debuting in August 2020. Look at all the ways you can customize colors, obs times, dates, ranges, completeness, and set a default view. Get a map a certain way and press the “Copy Link to Map” button and paste that link somewhere else.

Water Year Summaries: wys.cocorahs.org Debuting in October 2021. Dynamic. With every report you submit, they update. No more waiting for updates in October and November as we did for many years.

Sample stations. You can change these URL’s to your station and year.

Station Water Year Summary Reports for Rhode Island 2019-2020

Download as Excel File

||| COLUMNS FILTERS

Do you see? You can change the station, the year and the State, in the URL.

Pull it together: Well, it’s Year 2022. New stuff won’t stop being rolled out. Now’s the time to get reacquainted and proficient with the stuff that’s already been built.

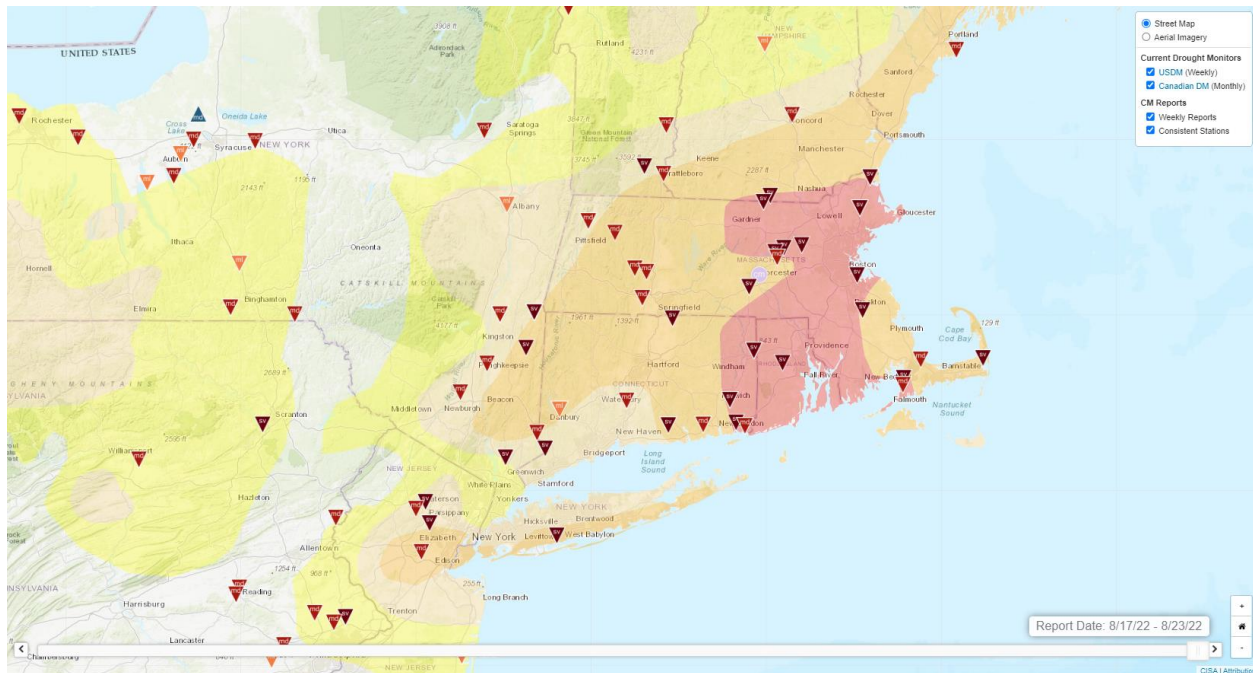

Significant Weather Reports: It is as easy to remember as 1-2-3

- **1” or more of rain or snow in 1 hour or less.**
- **2” or more of rain.**
- **Flooding.**
- **Anything you feel is significant!**

mPING app for Apple and Android: Citizen Science in action! Use mPING to report precip type and reduced visibility in real time.

Condition Monitoring Reports

Thank you for continuing to be the standout group in our network.

 **Wallingford Center 3.3 NNW**
Sat Aug 20 2022

Dry conditions continue with lawns, plants and, to some extent trees, showing signs of water stress. Recent rains have been very brief and measured only a small fraction of an inch. Nearby reservoirs are still at near normal levels but nearby streams are at lower levels than normal.

CT-NH-43 -- General Awareness, Plants And Wildlife, Water Supply And Quality

 **Newburyport 0.4 NNW**
Sat Aug 20 2022

.01 inches of rain in the last week, .12 inches so far for the month of August. Everything is drying up and brown. Trees with tap roots are doing OK but more shallow rooted trees have leaves shriveling up and falling off. Stream flows are low or non existent. Lawns are brown.

MA-ES-64 -- General Awareness

Detail and Summary for July 2022

From the National Weather Service (NWS) Climate sites for July 2022.

From your reports for July 2022

Observers reporting	572
Reported all 31 days	265
Completed by Multi-Day Reports	33
Missing 1 or 2 reports	98
Daily Reports	14,362
Zero Reports	10,188
Non-Zero Reports	4,174
Daily Comments	2,368
Multi-Day Reports	217
Condition Monitoring Reports	176
Significant Weather Reports	17
Hail Reports	4
Snowfall Reports	11,337
Snow Depth Reports	3,637
Total SWE Reports	2,460
Highest Daily Report	3.95" from Ridgefield CT 3.6 N (CT-FR-58) on 7/19

The Watershed Map is back on the website, so this list can be put together again.

Cover all days in the month, no overlapping Multi-Day reports and your station can be listed here.

This list is sorted by Watershed which is explained further in this 5 minute [video](#).

Rulers of the Snow

We are the Rulers of the Snow.

A list of 76 stations in July who reported snow fall and snow depth for all days.

Using the mobile app? Look at the 2nd page of the mobile app, "More Details" on the Apple App, and fill in those snow values. Make a snow fall and snow depth measurement with every Daily Report, if you can safely do so, ***all year round***.
