Community Collaborative Rain, Hail & Snow Network

February 2019

"Faithful followers, there is no shadow of me. A beautiful spring it shall be." The Groundhog is optimistic for an early end to winter. Living as close as we do to the coastal waters, our guard is up for whatever winter storms come up the east coast.

Reporting was strong in the month of January. We normally see a drop with reporting that starts slightly in November and bottoms out in February before spring time conditions result in a reporting rebound. Our January reporting was at the same level as it was in August. The two faces of January weather were on display. We are pleased that your reporting weathered both of those faces very well, and you did so as accurately as you did. Thank you for a great reporting month.

In this month's issue: The Grand List got long. The observers that joined us around three years ago are crossing over 1000 Daily Reports.

An assortment of reminders and tips follow, along with a single page of where your snow reports can end up, and a wrap up to the wet year of 2018. "The Rulers of the Snow" segment returns.

Let's get into it.

# The "Grand" List

Congratulations to all of these observers from our three states who have recently passed a milestone of 1000 Daily Reports.

### **3000 Daily Reports**

CT-MD-2 Portland 0.9 S

CT-WN-2 North Grosvenor Dale 1.7 SSE

### **1000 Daily Reports**

CT-NL-21	Griswold 0.9 N
MA-FR-17	Buckland 1.8 ESE
MA-WR-41	Auburn 2.6 SW
MA-BA-51	Orleans 3.0 S
CT-TL-18	Hebron 5.3 NW
MA-WR-43	Leicester 2.4 ESE

CT-NL-6	New London 1.0 NNW
MA-FR-13	Conway 2.9 NW
MA-WR-6	Southbridge 0.6 E
CT-NL-8	Uncasville-Oxoboxo Valley 1.6 ENE

## **Observer Tips**

Reporting was strong in January, and to go along with it, reporting mistakes were pleasantly few. Accuracy matters. Thank you. Keep the "Focus on the Gauge Catch". If you only have time, effort, energy to make one measurement, take the contents of your gauge and find its liquid content, and report that value in the 1<sup>st</sup> value in your reporting form.

**Snow cores**: If you do not cut a core of snow and find the liquid content of that core separately, please leave that reported value, the 3<sup>rd</sup> reported value, "NA" There can be a difference between "gauge catch" and snow cores, especially with wind, and especially with the rain/sleet/snow mix that we experience in our area. Avoid the temptation to take the "gauge catch" value and replicate that in the snow core value. In the realm of false zeros, slow down your habit of reporting zeros for snow cores in the 3<sup>rd</sup> value, if you have new snow to report in the 2<sup>nd</sup> value. "NA" for cores in the 3<sup>rd</sup> value and in the 5<sup>th</sup> value is acceptable if you do not find the liquid content of the core.

**Having a scale is the "weigh" to go!** If you are a new observer, we are not proposing that you need to spend more money on more tools. If you are a seasoned observer and are frustrated and constrained with the time and effort it takes to melt an icy gauge or a deep snow core, using an accurate gram scale, with the weight of the outer cylinder written on its bottom (450g-470g), and using 201g = 1" of liquid, makes finding the liquid content of winter precip, and 1"+ rains, simpler and easier.

Message of the Day. "Hilberg's Tips" Long before Monthly Newsletters came to your email box, the observers in Illinois have been receiving Monthly Newsletters of their own for over 12 years from their State Coordinator, Steve Hilberg. Looking towards what Illinois has been doing gave me the inspiration and material to realize that a Monthly Newsletter for our area was possible and would be beneficial to the observers.

After you submit a Daily Report, and you see one of Hilberg's Tips in the Message of the Day, please read that Tip. There is always something more to learn in this skill of being an observer.

**Snow Depth** In Nolan's recent newsletter, he mentioned the value that total snow & ice on the ground has. From a conversation I had with the hydrologists at our River Forecast Center, I would agree with Nolan. A snow pack on the ground can be a flood waiting to happen.

As we go through the 2<sup>nd</sup> half of winter, we're not asking to risk limb or safety. If you are a new observer, we're not trying to pile more on to what you are trying to understand. If you can, if you are able to, please make a snow depth measurement and report that value in the 4<sup>th</sup> value in your Daily Reporting form. The measurement only has to be the nearest 0.5". Zeros are valuable. Non-zero values will translate in your Water Year Summary with the "Days with Snow on the Ground" count.

During this time of year, I would encourage a look towards the Snow Depth measurements of a few our network's observers. In the western hills of our Hampshire County, look at MA-HS-7. High in the western Rocky Mountains of Colorado, look at CO-GN-18. In the Sierra Mountains of California, near the Donner Pass on I-80, look at CA-PC-1. See a 99.9" for snow depth? Click on the view icon and read the Comment. It could be deeper than 100"!!

Ours is a unique network. We are "The Rulers of the Snow"

**NOHRSC** – (pronounced no-risk) The National Operational Hydrologic Remote Sensing Center is based in Chanhassen MN, near Minneapolis. From there, they monitor snow depths and its water equivalent across North America. https://www.nohrsc.noaa.gov

In the <u>January 2018</u>, <u>February 2017</u> and the <u>January 2016</u> edition of this newsletter, I wrote about this same topic.

Submit a Daily Report, precip, new snow, snow depth, total SWE, and chances are good, you can find that report on their website, and find maps to go along with it. Very new observers may not be in their database, but the rest of you should be.

On the website, there is a text box labelled "Observations Near". I entered "Webster MA" to get a sampling of reports from our 3 states.

Click around. Experiment. Pick a date from the past. Find your reports and more. Your submitted reports do go far.

A wet year for 2018 Last month, we had our "Salute to the 70's" segment, pointing out those that reported more than 70" for Year 2018. For Rhode Island, we thought that RI-PR-17 (Cranston) broke the state record, but the Northeast Climate Center said not. The record for Rhode Island is 74.60" from North Scituate in Year 1972.

Recently, NWS Eastern Region updated this graphic below. You might recognize some of our observers in our 3 states and NH-CH-20 is included.

#### Top 5 Highest 2018 Rainfall Totals By State - Eastern US Connecticut Maine **New York** South Carolina Moosup CT \*123.45 76.89 West Rockport ME Phonecia NY 81.30" 65.33 Jocassee SC Madison Center CT 73.82 64.18" Wurtsboro NY 73,39" Caesars Head SC 115.10 Eastport ME Hampton CT 71.09 Robbinston ME 59.96" East Jewett NY 71.62" Table Rock SC 100.37 70.42" Ridgefield CT Cape Neddick ME 59.64" 70.71" 95.24 **Upton NY** Slater-Marietta SC 59.43" 69.78 68.83" 91.89 Norwich CT Kennebunkport ME Port Jefferson Station NY Salem SC Delaware **North Carolina** Maryland Vermont Smyrna DE 71.12" Thurmont MD \*84.35" Mount Mitchell NC \*139.94 Peru VT 65.29 84.11" 61.31 Newark DE 66.08 Jonas Ridge NC 136.87 Wilmington VT Catonsville MD Wilmington DE Mechanicsville MD Lake Toxaway NC Jeffersonville VT 55.34 66.08 (5.1 mi NNW) Millers MD Cedar Mountain NC West Halifax VT 79,35 123.80 53.75 Laurel DE 65.61" Kingsville MD Ludlow VT **Highlands NC** 116.41" 53.13" 78.72" Massachusetts Virginia District of Columbia Hannibal OH 70.51" Montebello VA \*97.34 Kingston MA 74.90 \*74.40 Dalecarlia Reservoir Taunton MA Steubenville OH 69.55" Roanoke VA (5.8 mi SW) 72.97 87,33" National Arboretum Norton MA 72.25" **Newport OH** 66.85" Sperryville VA 86.48 Reagan National Airport 66.28 Plainfield MA Marietta OH 66.57" Madison VA 72.03" 84.62" Florida Springfield MA 71.77 Glouster OH 65,36" Rocky Mount VA 83,33" Alford FL 102,61 New Hampshire Pennsylvania West Virginia De Funiak Springs FL 97.25 Mount Washington NH 94.22" Hidden Valley PA 198.86" Parsons WV \*96.99 Vernon FL 95.58 Pinkham Notch NH 72.17 Fairfield PA 84.23" Snowshoe WV 86,30" Gonzalez FL 95.55 Greenville NH 67.90 Mahanoy City PA 83,67" Hacker Valley WV 80.86 Niceville FL 91.01" Davis WV South Sutton NH Palmerton PA 80.28 Georgia **Burton WV** Rindge NH Laurel Summit PA 81.94" Germany Valley GA \*116.48 Rhode Island New Jersey \*Preliminary state Helen GA 107.71" Mine Hill Township NJ 79.89" Cranston RI 71.24" precipitation record -Sautee GA 103.60 Rockaway NJ 79.28 Pending review of the 95.66 Rabun Gap GA Hardyston Township NJ Woonsocket RI 68.43 77.77 State Climate Extremes Tugalo Dam GA 95.23 Howell NJ East Greenwich RI 76.96 67.62 Committee (SCEC) Boonton NJ North Smithfield RI

To finish up Year 2018, The National Centers for Environmental Information (NCEI) published its <u>summary</u>. Massachusetts had its wettest year on record. We define the climate!

# **Detail and Summary for January 2019**

From the National Weather Service (NWS) Climate sites for Jan 2019.

Rain came on New Year's Day, and again between the 5<sup>th</sup> and the 6<sup>th</sup>. Dry and cold after the 10<sup>th</sup> through the 19<sup>th</sup>. Snow, sleet, freezing rain, rain on an event for Sunday the 20<sup>th</sup>. Brutal cold temps for the 21<sup>st</sup> and 22<sup>nd</sup>. Rain started before the 25<sup>th</sup>, noted by the map on the next page, and washed the snow away with local area flooding. Snow to the north, rain to the south on the 30<sup>th</sup> that froze solid in the gauge. Our first Snow Squall Warnings to end the month on the 31<sup>st</sup>.

Significant Weather Reports, mPING reports, CT-NL-6 calling in a Flood Advisory on the 5<sup>th</sup>, and one hail report from RI-PR-60 on January 6<sup>th</sup>. We saw them all and we thank you for the strong reporting month of January. Take in the next section with appreciation of your efforts.

Variablity in precipitation. It is what we do best! Keep that in mind with every snow fall forecast that you see.

Keep up with the day-by-day reporting.

## **Accumulated Precipitation (in)**

January 01, 2019 to January 31, 2019

#### "We do not live at the airport"

Without much snow for this month of January and for the past 3 months, there may not be that sizable of a difference between these automated gauges and yours. However, do check your totals to a nearby airport.

Our network's average was about 6.0" for January. This table's average for January looks no where near 6", closer to 4.6"!

Our network does not use automated gauges. And we do not live at the airport!

## Rulers of the Snow

We are the Rulers of the Snow. If you are able to, keep making a snowfall and snow depth report every day, rain, snow or sunshine.

January 2019 as a calendar. A count of your Daily Reports by Date. Magenta colors are for the highest counts. Lime green color for the lowest counts.

Our average was 295 Daily Reports per day. Another good month, with very little drop off.

		Jan	uary 20	January 2019						
Sun	Mon	Tue	Wed	Thu	Fri	Sat				
		1 318	300	3 306	306 306	5 308

27 272	28 280	29 287	30 297	31 283						

From the Drought Monitor.

All gone! We start from here as we begin to lengthen our days and approach summer sunshine and evaporation.

February is tough with cold and snow. If you are in the habit of making Comments with your Daily Reports, try making a Condition Monitoring Report. One report a week is all that we seek.

Every drop counts and zeros do too!

For a viewing explanation on the Drought Monitor, the CoCoRaHS animated video is on YouTube.

## Wrap up

February is the shortest month of the year. Because of our northern climate, it tends to be our lowest month in reporting for our network. Climatologically, February is our driest month of the year, averages of precipitation near 3.5", down from its usual 4" per month.

Whether you put much stock in the shadows of a Groundhog or not, the Climate Prediction Center, located in College Park MD, updates their 6-10 day and 8-14 day outlooks, every day after 3PM. The temperature forecasts within 2 weeks tend to be reliable. The precipitation forecasts can be a good guide, but we know how variable precipitation can be. The plans that I make this week and weekend, are based upon their predictions for the next week and the weekend after that. Check them out at <a href="https://www.cpc.noaa.gov">www.cpc.noaa.gov</a> updated 7 days a week after 3PM.

The first harvest of the year is coming to our New England states. Not from the ground, but from the trees, specifically the sugar maple trees. Soon, the slightly sweet sap will start to flow, the harvest of sugar will begin, and the end of winter will be upon us.

Thank you for all that you do for CoCoRaHS, whether in the past, present and in the days to come.
