

## Remember to subtract the amount of warm water that you've added to the tube

Reading of 0.79 inches of water  
minus 0.50 inches of water added  
gives a final reading of 0.29 inches

Tube full	0.79
- Water added	0.50
-----	
Final reading	0.29

When snow doesn't cover the ground evenly:

←  
If half the ground has  
2.0" and half the ground  
is bare, report 1.0" as  
your total depth.

→  
If more than half the  
ground is bare report "T"  
(trace) and mention the  
range of depths in your  
comments.
