

## **Pam Knox**

Pam Knox has a degree in meteorology from the University of Wisconsin and has worked in the fields of weather and climate for over thirty years. Her previous jobs included work in the National Weather Service Office of Hydrology, as the Wisconsin State Climatologist, and as the Georgia Assistant State Climatologist. She is now working for the University of Georgia as an applied climatologist teaching Extension agents about climate variability and change and its impacts on agriculture. In addition, Pam has worked as a Certified Consulting Meteorologist specializing in expert testimony since 1998. She has served as an expert witness in over 60 cases involving some aspect of weather and its effects on people, vehicles and properties.
