

Carrie Olheiser

Carrie Olheiser began her career with the National Operational Hydrological Remote Sensing Center (NOHRSC) in 2002 as an Associate Scientist. Carrie is currently the Operations Manager and Chief of the Airborne Snow Survey Program. Carrie experienced the devastation of a major flooding event firsthand during the Red River flood of 1997 while studying Atmospheric Sciences at the University of North Dakota in Grand Forks. Her experiences during this time inspired Carrie to pursue a career focusing on snow hydrology and it's effects on flooding and water supply.
