Now thru January 10th  
"YEAR-END" FUNDRAISER

\$175,342 Raised

3,346 Donors

Successful fundraiser

"Thank you to all of the CoCoRaHS staff for all that you do to keep things running as smoothly as possible and for the daily encouragement you provide to we observers!" - Donor

# Other projects directly or indirectly involving CoCoRaHS

note: these are not included in the budget numbers above

- NIDIS Intermountain West Drought Early Warning System (continued support for condition monitoring) (primarily Henry Reges)
- Citizen-Enabled Aerosol Measurements for Satellites (CEAMS), NASA-funded project led by John Volckens at CSU (Noah Newman and Nolan Doesken contribute to citizen science aspects of this project)
- NSF-funded “Spotty Rain” project (Noah Newman)
- NSF-funded “Water in the Four Corners” project (Noah Newman)
- Microsoft AI for Earth grant of cloud computing resources (Julian Turner)

# And let's not forget the thousands of volunteer hours and other types of in-kind support!

- Over 250 state/regional volunteer coordinators
- WeatherYourWay.com
- Each volunteer's daily observation . . . . Wow!
- KRESL Design – our shirt & logo graphic design
- Linda Erikson – Station processing/Onboarding
- Many others

And now an  
update  
from Nolan

2004
