

Your (Early) Christmas Forecast

Dreaming of a White Christmas? Well, there's always next year. Dry conditions are in store this week, but by this weekend and into Christmas Day, rain chances look to increase areawide. Fortunately, hazardous weather is not expected at this time. Certainly the rain is good news as we continue to chip away at our drought. But for those of you wanting your precipitation in the form of snow or hoping for sunny skies, sorry to be the Grinch.

Be sure to stay tuned this week as the forecast is refined for timing of rain and how much we can expect!

December 9th Tornado Outbreak

In total, seven tornadoes impacted portions of Middle Tennessee on December 9th, making this one of the worst December tornado outbreaks to impact Middle Tennessee. Unfortunately, six people were killed, making this the deadliest outbreak for the area since the March 2020 event. For more information about the tornadoes, including an interactive map, storm survey pictures, and other December tornado statistics, [check out the event page](#). It's still being worked on so be sure to check back for updates.

Meet
Justin!

Justin is a mathematics teacher at Riverdale High School. In the classroom, Justin shares his love and passion of weather and meteorology with his students, and thanks to the connection between math and meteorology, he's able to incorporate weather learning into his lessons. Justin is also an amateur radio operator, SKYWARN spotter, and a member of the Rutherford County ARES group. In his spare time, he enjoys being with his wife and kids, playing guitar, and watching the weather. Justin recently earned the American Meteorological Society's Certified AMS Teacher (CAT) designation which is a professional recognition for completing required coursework and being actively engaged in raising Earth science literacy. Congratulations, Justin!

I would love to recognize and highlight YOU in these newsletters! If you're interested, tell me about yourself via [this form](#).
