

# Maximizing Insights: The Power of Leveraging Multiple Data Networks for a Comprehensive Forensic Analysis

Kelly Cebulko, *STM Weather*

“Consider that within 50 miles of downtown Boston there are over 6 dozen civilian airport sites, 5 military sites, and over 5 dozen cooperative weather stations, producing many thousands of observations each day..”

WARD AND LEAVITT, BULL. AM. MET. SOC., DECEMBER 1971

# Data Sources: The Ad-hocs

A word cloud of various data sources. The words are arranged in a roughly circular shape, with 'DATA SOURCES' being the largest and most central. Other prominent words include 'HURRICANE TRACKS', 'LIGHTNING', 'COASTAL DATA', 'PRECIPITATION FREQUENCY TABLES', 'SHIP OBSERVATIONS', 'RIVER GAUGES', 'BUOY DATA', 'FORECAST MODELS', 'SUNRISE SUNSET TIMES', 'SATELLITE', 'CLIMATE NORMALS', and 'CWOPS'. The words are in different shades of gray and white, with some overlapping.

PRECIPITATION FREQUENCY TABLES

What our supplemental resources do well

## Station Metadata

[Open Site Photos Viewer](#)

### General Information

Station ID	VOOR
Location	3.8 km (2.4 mi) W of Voorheesville
County	Albany
Latitude	42.65242° / N 42° 39' 8"
Longitude	-73.97562° / W 73° 58' 32"
Elevation	115.1 meters / 378 feet
Installed	August 16, 2016 12:10 pm
Station Number	3
Climate Division	5 - Hudson Valley
NWS Forecast Office	<a href="#">ALY - Albany, NY</a>
Type of Site	Vineyard/Orchard
Soil Type	Chenango gravelly silt loam, loamy substratum
Obstructions within 100m	Orchards, trees
Surroundings	Open area surrounded by orchards and some larger trees

[Show Measured Variables >](#)

### Soil Information

The NYS Mesonet collects soil samples from each level of soil where we install instruments. The soil samples are sent to a laboratory for analysis. This table shows the soil composition at each level.

	% Clay	% Sand	% Silt	Chart	Texture
5 cm	11.2	44	44.8		loam
25 cm	10.3	46.6	43.2		loam

### WMO Classifications

[WMO guidelines](#) give different variables a classification number, with 1 being the best. Higher-numbered classifications indicate that the site's surrounding environment may cause uncertainty in the data.

Temperature/Humidity	<b>1/5</b>	
Surface Wind	<b>3/5</b>	Roughness class = 6 because of orchards and trees
Precipitation	<b>2/5</b>	Small group of trees to the N with angular height of 17 degrees and angular width of ~5 degrees

COOP Regional  
Reports

"Numerous reports of icy roads this morning where the roads have gone untreated, reports from local, county, and state DOT departments within the county of Hudson. still, isolated reports of icy surfaces were noted at this time. APM / HSNND"

# CoCoRaHS Depth Notes

**Snow depth reported: 1.5"**  
Comment: "Snowpack varies from 0 to 3 in"

CoCoRaHS/COOP  
Precipitation Times

Precipitation observed times  
Precipitation likely times  
Rain and sleet began about 11  
am

## CoCoRaHS/COOP Precipitation Types

"snow began about 7:30 and there was an inch on the ground by 9:30."

"Snow began between 7-8am changed to brief period of sleet about 11am at which time I measured 1.3" accum. Changed quickly to freezing rain which lasted into early afternoon with aprox 0.1" ice then plain rain mid afternoon thru early eve ended by 10pm"

Almost helpful...but not quite

Snow depth reported: 7"

"The Total Snow is measured in an area where no sunlight hits right now during the day. The areas, where sunlight hit have little to no snow now"

		PRECIPITATION																					
		Draw a straight line ( ——— ) through hours precipitation was observed, and a wavy line ( ~~~~~ ) through hours precipitation probably occurred unobserved

# Summary

Daily Precipitation Report	
Station Number: MA-MD-12	Station Name: Acton 1.3 SW
Observation Date	1/8/2024 7:00 AM
Submitted	1/08/2024 7:04 AM
Gauge Catch	0.45 in.
Notes	Overcast, light air, snow ended around 9PM yesterday; 25.0F, RH 93%, BP 30.13" rising. Quite a bit of snow drifting yesterday afternoon. Snowpack depth average of 5 locations.
Snow Information	
24-hr Snowfall ⓘ	5.6 in.
24-hr Snowfall SWE ⓘ (Snow Water Equivalent)	0.47 in.
24-hr Snowfall SLR ⓘ (Snow to Liquid Ratio)	11.9 : 1
Snowpack Depth ⓘ	10.0 in.
Snowpack SWE ⓘ (Snow Water Equivalent)	1.09 in.
Snowpack Density ⓘ	11%

Additional Information	
Flooding	--
Additional Data Recorded	No

## Data consistency

Long term record, no missing data, multi-day totals noted when data missing

## Anything extra beyond data

Metadata, photos, comments

## Future:

- Certification of comments/observation time
- More info on surrounding area, photos or text
